

SAMPLE WHITE-LABEL REPORT

Monthly WordPress care report for each client website.

A detailed multi-page sample showing how WPPulso Agency turns monitoring into client-ready proof: uptime, backups, updates, vulnerabilities, maintenance timeline and next actions.

CLIENT WEBSITE REPORT

WP Acme Client Website

example.com - September 2026 - Prepared by Your Agency

82/100

Overall condition

99.95%

Uptime

3 days

Backup age

2

Updates pending

0

Critical alerts

Area	Status	Client-friendly explanation	Agency action
Uptime	Healthy	The website stayed available during the monitored period.	Continue normal monitoring.
Backup readiness	Fresh	Latest backup is recent enough for normal recovery confidence.	Keep weekly verification active.

Area	Status	Client-friendly explanation	Agency action
Plugin updates	Review	Two plugin updates should be tested before applying.	Apply on staging first.
Security exposure	Clear	No critical vulnerability warning is currently open.	Continue update watch.
File monitoring	Watch	One file change was recorded and should be reviewed.	Confirm expected file change.

WEBSITE DETAILS

Each website gets its own maintenance summary.

Site profile

CMS: WordPress 6.x

PHP: 8.x

SSL: Active

Cron: Working

Risk score reason

Score is reduced by pending plugin updates and one file-change item that needs review. There are no critical security alerts.

Client message

Your website is stable. The maintenance team will review two plugin updates and one file-change item before making changes.

MAINTENANCE TIMELINE

Proof of work during the month.

Sep 02

Weekly scan completed. No critical security risk found.

Sep 09

Backup age checked. Latest verified backup was 3 days old.

Sep 16

Uptime check confirmed healthy availability for the monitored period.

Sep 22

Two plugin updates detected and added to staging review queue.

Sep 28

Monthly report generated for client review.

NEXT ACTIONS

Clear recommendations for the client and agency.

Do now

Review plugin updates on staging and confirm the file-change item.

Do next

Apply safe updates after staging verification and record completion in next report.

No emergency

There is no current critical action needed from the client.
